			<b>NDB 203.0 (2.5 NM FINAL RW 32)</b>
			<b>FIELD ELEVATION +1085</b>

Weather Report

YBOU - Clouds Few. Viz Unlimited. Winds 0 knots from 352 deg.

YJVS - Clouds Few. Viz Unlimited. Winds 8 knots from 355 deg.

YJVS is difficult to see. The best approach is to steer left of the NDB then turn to fly directly toward the NDB when it points toward 319 degrees. Over fly the NDB at 2,000 ft and you should see a slightly darker green rectangle ahead. The taxiway and parking pad is located mid-way on the right of the runway and is concrete and more visible.

If the winds are different than forecast and necessitate landing on rwy 14, then overfly RW 32 and execute a procedure turn. (Continue on RW heading for 2 minutes, turn left to 280 deg. fly for one minute. Turn right to 100 deg. Then direct to field following NDB bearing 139.
