

# Loading 'Situation' files in X-Plane 11

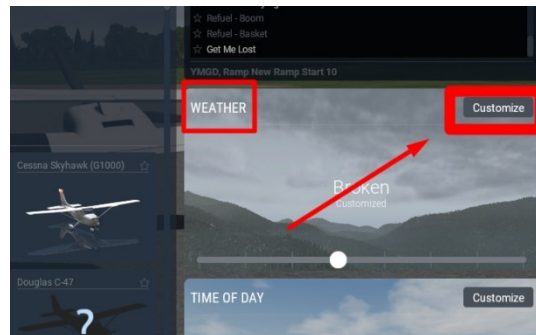

Before you start to load the 'situation' files in X-Plane, please do the following steps.

1. Set the 'Weather mode' to 'Manually configured'.

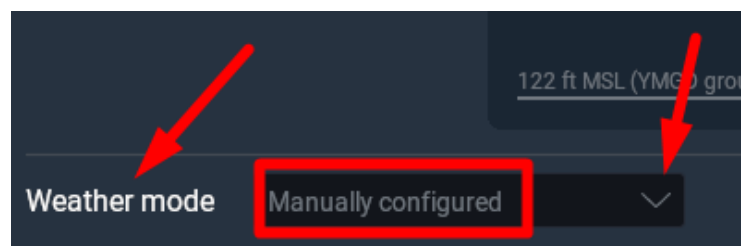

- In the X-plane upper menu, go to "**Flight**", then select "**Flight Configuration**"

- The 'Flight Configuration' page will open and to the right, select "**Customize**" in the 'WEATHER' tab.

- The 'Weather Settings' page will open and bottom left, change the 'Weather mode' by clicking on the down arrow and then select "**Manually configured**".

- Press 'Done'.

2. You may now load a situation file and the weather conditions will be loaded automatically.
